version 2005.2

the Draka EP PC board program

The Draka EP Printed Circuit Board program is the fast and economical way to repair, exchange or replace your non-functioning PC boards and get your vertical transportation system back to 100% operation.

This program covers over 1500 different PC boards from 14 manufacturers. If you have an electronic component that no longer works, just call 1-877-DRAKA EP to:

REPAIR AND RETURN THE BOARD: This is your most cost-effective option. Draka EP's PC board repair process includes troubleshooting, replacement of defective components and final testing. Our in-circuit, functional and simulator testing capabilities guarantee that your board is ready to install when shipped. Should a repaired PC board fail during the first 30 days, return it for full credit.

EXCHANGE THE BOARD: Reducing downtime is the most critical aspect of quality elevator service. Exchanging your non-working PC board* gets your elevator back in service quickly. Place an exchange order with Draka EP and a refurbished, tested and warranted board can be delivered overnight.

PURCHASE A BOARD: Versions of all the PC boards listed are available for purchase and immediate delivery. Additional PC boards are available; call your Draka EP representative for more information.

Our repair program offers everything from individual component replacement to actually filling holes in the boards caused by destructive burn-outs. Repaired components go through three levels of testing prior to return. Our repairs have a 99.999% rate of success.

*Note: you may not exchange a board that has been damaged by lightning or water, nor may you exchange for an upgraded board (i.e. a version 2 board for a newer version 3 board). Only OEM boards may be exchanged - we cannot accept aftermarket boards.

ARMOR p/n	Description
C058826101	1.0 - 5 sec timer 250VDC
C058826104	0.5 - 5 sec timer, 110VDC
C058-8261-0418	Timer
C058-826105	0.5 - 5 sec timer
C058-8261-05	0.5 - 5 sec timer
C058826203	5.0 - 40 sec timer
C05882630-109	0.5 - 5 sec timer, 110VDC
C05882630-115	2.0 - 10 sec timer, 110VDC
C05882630-208	Timer
D058800702	Thyristor
D0588371-01	Car control

CEC p/n	Description
1173	Diode
1107	GVI-1 for Modmaster/Swift 5000
1150	PMI-16 I/O - unpopulated (Dover/CEC)
1172	TCD-2 TOC interface for Modmaster/Swift 5000
1225	Car 8825 W/SBC341
1226	Group 8825
1290	SBC-341
1418	Group 8825 w/SBC341
1465	Group 8825 w/SBC341, SBX351
1466	Car 8825 w/SBC341, SBX351
1492	RTG-3 for Modmaster/Swift 5000
1498	DAR-3 for Modmaster/Swift 5000
1510	REG-3 for Modmaster/Swift 5000
1825	Car 8825
1826	Serial comm mod RS422 FOR CPU
1827	Car/Group CPU Swift 5000 SBC-18603A-03
2090	DAR-3 for Modmaster/Swift 5000 w/DSD412
2142	CPT for Modmaster/Swift 5000
2142M	CPT for Futura w/SCR drive
2147	EPU COP
2215	SEM

DELTA p/n	Description
01-1274	Driver
50-1274	Driver
5049-00-0600	Analyzer assembly

DOVER p/n	Description
105248	Power board 4 slot
105251	Board top/bottom 4KY
105252	Interim board
105254	Option board 4 slot
110941	Emergency light
112261	Optical leveling
